

## Thank you! Thank you! Thank you!

My staff and I really enjoyed another Reader's Choice award from the *Midland Daily News*. Your vote means a lot! When there are 50 dentists in the Midland area, to consistently be voted in the top three is very flattering.

## Tech Heads!

Tech heads we are not, but we do keep up with what is the latest in dental technology. We now put your x-rays in a scanner and they appear on a computer monitor 17 seconds later. We can enlarge the images so you can see what we see all with less radiation. That's awesome!

## Fridays! Fridays!

As some of you know, we say we are not open Fridays, but we work many Fridays. We clinically do large crown and bridge cases and hygiene "catch-up." We also do anything from continuing education to cleaning the supply room. If you really need a Friday, let us know. Friday, January 5<sup>th</sup>, we are open to help out college students get "cleaned up" while on break!

## Floss Your Heart? WaterPik™ Your Veins?

Recent health studies have reported that chronic gingivitis and gum disease can increase your risk for heart attacks and strokes. Please let us help you!

## FSA for 2007

Don't forget to get scheduled if you have any pre-tax FSA money that will disappear. Also let us know if you need an estimate for 2007 for your FSA account planning.

### Staff Changes

Well we are very sorry to say goodbye to our friend and hygienist, Susan Sutton. She and her family are moving to Omaha. We were blessed to have her and now we are blessed to have Erin VanderWall join our staff. Erin is an extremely pleasant young lady who just graduated in the Science and Art of Dental Hygiene. We are impressed with her and you will be also!

Thanks for being so great to work with and letting me help you!

Sincerely,

*Dr. Krim*
